

www.canam.com

CANAM Group manufactures integrated solutions for the construction industry. It operates 12 plants and employs over 3,500 people in Canada, the United States, Romania, India and the Philippines.

Challenges

- Secure offsite protection for 200TB of corporate data
- Real-time access to backup data for granular and item level recovery
- Ability to recover large amounts of data in case of a disaster / malicious attack
- Compliance with regional data residency and data protection requirements
- Early Ransomware detection and prevention
- Secure access to backup data for distributed IT team and end-user self-service recovery
- Slow and unreliable legacy backup solution
- Secure backup data access

Results

“

"Afi delivered an easy-to-use and highly secure platform, offering scalability that required minimal effort from our IT team. This robust solution not only efficiently protects 200TB+ of data but also operates at impressive speeds, ensuring timely access to backup data."

- Marc Bisson, IT Director

Efficient data protection

Afi SaaS backup service safeguards more than **200TB+** of data for Canam Group, covering 3,500 users and over 4,000 drives

Fast search, access and recoveries

Provides access to 200TB+ of backup in a matter of seconds via UI, with a full-text search capabilities. Very fast data recovery speed.

Ease of use and Reduction in HelpDesk load

Enables secure access to backup data via OKTA for IT administrators and end-users, enabling them to perform data recovery via self-service, which significantly reduced the load on the HelpDesk team.
